

Arcam, a GE Additive company, brings together best-in-class Additive Manufacturing systems, the highest quality materials and real-world production expertise, changing the way manufacturers conceive and produce metal components. Together we use our collective knowledge to inspire and disrupt conventional thinking. Through our solution orientation, Arcam is an innovative partner for advanced manufacturing, primarily in the aerospace and medical industries.

Arcam EBM is a part of the GE Additive group and provides Electron Beam Melting systems through Arcam AB in Sweden. Read more about our technology: www.arcam.com or www.ge.com/additive

Manager Software Development at Arcam

We are looking for a Manager for our Software Development Department within Arcam's Product Development organization.

Arcam, a GE Additive company, is an innovative partner for manufacturing in the orthopedic implant and aerospace industries, where we deliver customer value through our competence and solution orientation. Since the birth of Arcam, our vision has remained the same: to revolutionize the art of manufacturing complex parts. Featuring some of the most advanced additive technologies available, machines from Arcam enable customers to grow products quickly and precisely.

The Role

You will be responsible for two development teams, that work cross-functional with exciting disciplines within R&D such as mechanics, electronics and process development. The teams (15 people) consist of ambitious, problem-solving and competent developers who develop innovative technology. Your main responsibility is to ensure that your department delivers as planned and stay updated on how the progress is moving forward. You will collaborate with different departments within the company.

You will be a part of the Technology Management Group and you will report to VP Product Development.

We offer

A fun, flexible and technically advanced environment with interesting customers. Full time position with a wide variety of added employee benefits, including bonus, flexible working hours, health and pension insurance benefits. We offer you an exciting and global working environment which will give you valuable experience and contribute to your future development. You will have the opportunity to interact with highly committed colleagues from different cultures.

We strive for gender balance and believe that actively prioritizing a high level of diversity in our workforce creates competitive advantage. It is our people that make the difference!

Responsibilities

- Budget responsibility
- Develop and improve working methods and relevant processes as well as enable tools and IT system
- Resource management
- Performance reviews together with the team members
- Technical responsible for software architecture

Profile

- Great interest in developing and leading people
- At least 5 years relevant experience within a product development organization
- Strong understanding and experience in agile methods and continuous integration/delivery experience is desired.
- M.Sc Computer science or equivalent
- Great English speaking/writing skills.
- Experience of SAFe is a merit.

As a person, you are positive, structured and pragmatic. You bring energy and drive to the teams you work with. You focus on solving problems without prestige.
